Special Issue – United Nations Emerging Technologies: January 10, 2020

Special Issue – National Science Policy Network: April 1, 2020

The **Journal of Science Policy & Governance (JSPG)** is a non-profit organization and interdisciplinary peer-review publication managed by and for students, postdocs, policy fellows and early career researchers from around the world.

For ten years, JSPG has published high-quality policy solutions covering the widest range of science, technology and innovation policy topics authored by students, young professionals and early-career trainees of all academic and professional backgrounds.

JSPG articles range from 1500 word op-eds to 35 page policy assessments and address a variety of issues including, but not limited to, health, climate, the environment, space, energy, innovation, technology, competitiveness, STEM education, defense and international science diplomacy.

JSPG's readership is comprised of scholarly and professional audiences in science and technology policy and related fields including space policy, energy policy and science communications. JSPG issues are published in an open-access format and actively promoted through outreach and social media led by a dedicated professional staff.

JSPG is supported by a distinguished advisory and governing board of thought leaders in science policy and actively engaged in partnerships with academic institutions and national coalitions focused on science policy. JSPG partners and collaborators include the **Engaging Scientists and Engineers in Policy (ESEP) Coalition**, the **National Science Policy Network**, the **Union of Concerned Scientists**, the **Canadian Science Policy Centre**, **Arizona State University**, and the **United Nations Major Group for Children and Youth**. By publishing in JSPG and/or serving on the editorial board, students and young people can bolster their S&T policy credentials while contributing to current policy debate.

Visit www.sciencepolicyjournal.org for more information. Join our **newsletter** and follow the Journal on **Facebook**, **Twitter** and **LinkedIn** at [@SciPolJournal](https://twitter.com/SciPolJournal) to receive future call for papers/editorial board applications, job postings, news and more.
